

BIRDS OF PREY

The Canadian Raptor Conservancy performs live, free-flight demonstrations.

Some of the fabulous birds that are used in the shows include:

Bald Eagle	Golden Eagle	Harris Hawk
Barn Owl	Great Horned Owl	Red-tailed Hawk
Peregrine Falcon	American Kestrel	Turkey Vulture

Plus a whole host of other birds of prey from around the world.

Each demonstration includes 5 different raptors from around the world, including at least 3 free-flying birds.

This unique encounter with nature's flying hunters might include:

- The bird with the best vision in nature, able to spot its prey from over 20 km away.
- The only species of hawk that hunts in a pack, just like a family of wolves.
- The bird of prey that has the most highly developed sense of smell in the world - even better than a bloodhound.
- One of the world's most nocturnal animals. This owl can find its food on the darkest of nights using only its ears.
- The amazing falcon, as it folds its wings and accelerates into a vertical dive, reaching speeds of up to 200 km/h as it flies over the crowd.

Located on the east side of Hall A

Show times: 3:00 p.m., 5:00 p.m., & 8:00 p.m. daily (Tuesday shows are 5:00 p.m. & 8:00 p.m.)
